COURSE NAME: INTERNET TECHNOLOGY AND WEB DESIGN

COURSE CODE: SWE2106

PROJECT NAME: YOUR RELIEVER PROJECT DESCRIPTION

NAME: GROUP I

NGABIRANO HANIEL 2024/BSE/149/PS

MWIMA EDRINE 2024/BSE/130/PS

NSUBUGA ARAFAT 2024/BSE/154/PS

NAMANYA SPENCER 2024/BSE/140/PS

NATUKUNDA MARY RITAH 2024/BSE/147/PS

GROUP I PROJECT DESCRIPTION

Problem: Stress and Anxiety.

After a thorough analysis and study of our society, it came to our notice that a number of people(Students) face a lot of emotional/mental health challenges and unlike in our high schools and home environments where we were provided with counselors and also a times share with our close family members, students at campus don't have anyone to talk to yet they are facing aloot of challenges for example financial stress, academic stress and also maybe social stress(stigmatism).with all these challenges these students even at times don't perform to their capacity just because of their mental unwellness,start taking drugs, others dropout and some even reach the red bar of committing suicide. In this the mental wellness of a student indeed matters for his/her perfect progress.

Solution: Stress and Anxiety web app.

With our lately discussed problem, our team noticed that this problem can be tackled with a computing solution and that's why we choose a stress and anxiety web application naming it **Your Reliever.** This is an application that will enable students to easily get in touch with professionals that is to say; therapists, counselors, religious leaders. Via this app a student can also get access to resources like motivational and inspirational music, meditation music to bring his/her mind to a relief and can also upload his video to share his/her experience in case he doesn't mind. The student can also gain access to a community chat platform and interact with other members on the platform. With a description on these services provided by this relief application, we indeed believe that there will be a great progress in the wellness of the mental health of students.

Planning Stage:

Firstly we defined our stakeholders in our project as being;

- Students and Alumni
- Counselors
- Therapists

Hence leading us to the description of our **user requirements** as part of our project requirements;

- A user should be able to upload their profile
- Talks between professionals and users should be kept confidential
- A user should be able to set a goal
- Progress tracking inform of charts/graphs.

Functional requirements

- Content library(inspirational videos, music therapy)
- Guided meditation
- Notification and reminders
- Community support(chat forums

Technical requirements

- Compatible on all platforms and search engines
- Robust server
- Security measures

User interface

- Friendly design
- Visual aesthetics

In conclusion, your reliever is a project that minds about peoples' mental wellness for a settled mind is a workshop of success. This what pushed our group (Nsubuga Arafat, Ngabirano Haniel, Mwima Edrine, Namanya Spencer, and Natukunda Mary Ritah) to put it in actions using the skills learnt from web design and internet technology despite the few challenges encountered. We also take this opportunity to thank Lec.Adones Rukundo for the endless efforts to enable us to accomplish this achievement.
